WHOLESALE PRICE LIST

This list cancels all previous quotations. Prices subject to change without notice.

GUARANTEE

We guarantee all stock to be first class in every respect and up to standardized grading. We give no warranty either express or implied as to the quality, life or productiveness of stock we sell. It is mutually agreed that our liability for stock proven untrue to name shall be limited to the original purchase price. All shipments travel at risk and cost to the purchaser. Our responsibility ceases on delivery to the carrier. All stock has been inspected and declared apparently free from all diseases.

Claims must be made within 5 days from date of invoice, otherwise they will not be considered under any circumstances.

TERMS

All prices are F.O.B., Dover, Oklahoma.

Packing free with cash orders by truck. Cost of boxing or baling to be added on freight or express shipments. All terms are CASH WITH ORDER unless credit has already been established.

SHIPPING

We request customers to give definite shipping instructions regarding manner in which they wish goods to be shipped. In the absence of special instructions, we use our best judgment, but without assuming responsibility. We deliver by our truck in truck load lots at 35c per mile one way.

Dover, Oklahoma, is located 50 miles northwest of Oklahoma City, and 30 miles south of Enid, on Highway 81. Pay us a visit and see over 100,000 thrifty plants growing in containers.

WHOLESALE LIST

CONTAINER GROWN STOCK

The Container Grown Plants offered below have been properly spaced and sheared for compact, symmetrical growth. They are not grown in a Sand-Peat soil mix. We use our own Soil-Humus mixture that we have developed after several years' experience. Plants grown in this mixture may not make as fast a growth as some of the exotic soil mixtures but they will stand up better and transplant easily.

BERBERRIS MENTORENSIS ..... **Mentors Barberry**
1 Gallon Can ..... 2-3' .75

BUXUS JAPONICA ..... **Japanese Boxwood**
1 Gallon ..... 15-18" .75

BUXUS SEMPERVIRENS ..... **English Boxwood**

GRAFTING SCIONS

We can furnish Scions for Grafting in over 50 varieties. Ask for list.

TURFGRASS DEPARTMENT

IMPROVED BERMUDA GRASSES—

We have specialized in the production of fine turf grasses for many years. U-3 Bermuda was first introduced by us to Oklahoma in 1950. When you buy from KENYON'S, you are sure of getting the original, genuine Beltsville strain. The varieties listed below do not make viable seed heads and any seed offered as reproducing these strains are a misrepresentation.

	Per 100 ft.	per 1000 ft.
U-3 Bermuda Sod	**.30**	**.25**
Sunturf Bermuda Sod	**.40**	**.35**
Tiffgreen Bermuda Sod (328)	**.40**	**.35**

PLANTING DIRECTIONS—

Cut sod in 2" squares and space from 12" to 18" apart. Spacing depends on how quickly you want coverage. **DO NOT BURY.** Plant top of squares even with ground surface. Water thoroughly when planted. If you have been disappointed with planting dried out sprigs and stolons, try this quick, sure way of making a beautiful lawn.

HOW TO ESTIMATE REQUIREMENTS

One sq. ft. of sod cut in 2" squares and spaced—
12" x 12" will plant 36 sq. ft. of lawn area.
15" x 15" will plant 55 sq. ft. of lawn area.
18" x 18" will plant 81 sq. ft. of lawn area.
Divide the square footage in planting area by the spacing factor above and the result will be the number of sq. ft. of sod required.

EXAMPLE

Your lawn is 50' x 72' or 3600 sq. ft. If you desire quick coverage, you will use the 12" spacing and spacing factor is 36.

3600 sq. ft. -:- 36 = 100 sq. ft. of sod required.
Ask for our Booklet "Lawn Grasses for the Home."

SPRINKLER IRRIGATION EQUIPMENT

Our Irrigation department (Kenyon Irrigation Division) is the oldest Distributor of sprinkler irrigation in the Southwest. We maintain large stocks of aluminum tubing, couplers and valves, pumps, motors and engines, sprinkler heads etc., and parts and service for this equipment.

We will be glad to quote you a completely engineered sprinkler irrigation system for your field crops, container nurseries and lath houses, including pumps and engines or motors and necessary aluminum pipe with sprinkler heads.

Container plants can be watered efficiently and economically with sprinkler irrigation. We have one 2 HP. pumping unit with 2" aluminum lines that takes care of the moisture requirements of 50,000 container plants running only a few hours daily. Portable light weight aluminum pipe that will handle 200# pressure can be purchased complete with couplers for less than the cost of steel pipe.

Lath house irrigation can be handled with the inverted type of overhead #20U Rainbird sprinklers that will do a complete and thorough job of watering. Pipe for these sprinklers is supported by clamps attached to the roof of lathhouse and is never in the way. These watering systems can be made completely automatic to turn on and off at any time of the day or night.

We can also furnish complete equipment for automatic, intermittent misting systems for propagation of all kinds of plant material. These misting systems can be set to operate at any time day or night and misting cycle can be adjusted to your conditions.

If you have any kind of a pumping problem, let us help you. We can furnish and install motor or engine driven Centrifugals, Line Shaft Turbine Deep Well pumps, Submersibles and other types driven by any kind of available power, and in any capacity or head desired.

Remember, we maintain the largest stock of Irrigation equipment in Oklahoma, and service all types of equipment.
